---

## PROFESSIONAL EXPERIENCE

**General Assembly** - Software Engineering Fellow | Remote

Summer 2021

***Clambr** - React, Express, MongoDB/Mongoose, Axios, jsonWebtoken, bcrypt, Bootstrap, Styled Components, Asana, Figma, Zeplin*

- Created an app as part of a group project with both the SEI and UX cohorts to provide a way to keep track of jobs you are applying to.
- Implemented authentication/authorization.
- Styled with custom CSS and Bootstrap.

**Dollar Shave Club** - Software Engineer, Front End UI -Email/Landing | Los Angeles

November 2018 - July 2020

- Developed 2-3 emails per week to a subscriber base of 3 million customers, that scaled visually across all major supported email clients. Worked with the team on an ESP Migration project.
- Worked extensively with Litmus for testing to ensure cross-client/browser support.
- Adhered to WCAG 2.0 AA Accessibility Standards to ensure optimal reach for our email communications and web content to people with disabilities.
- Collaborated closely with Engineering, Product, and Design teams in weekly agile sprints to develop landing pages.
- Leveraged custom hooks to dispatch reducers to fetch data from the Contentful API.
- Utilized Git workflows to capture landing page development locally, communicate through code reviews/exploration, and manage/monitor deployments of landing pages via Git.

**Dermstore (Target Co.)** - Email Developer (Freelance) | El Segundo, CA

April 2018 - July 2018

- Performed email development for Target's online beauty e-commerce store.
- Worked within Salesforce as the Email service provider.
- Performed testing of emails to ensure cross client support.

**KERN** - Front End Developer (Freelance) | Los Angeles

February 2018 - March 2018

- Performed email development for national clients AT&T( DIRECTV) and American Express.
- Collaborated with the Development and Account teams to adhere to client needs.
- Tested emails within Email on Acid to ensure cross client support.

**TVGLa** - Front End Developer (Freelance) | Los Angeles, CA

November 2017 - January 2018

- Collaborated with a team to build two SPA websites for the client *Fox Searchlight*; performed maintenance of the Dreamworks Animation website for *Trolls*.
- Leveraged Vue to componentize our templates.
- Implemented SASS to promote cleanliness and reuse throughout the codebase.

**Advisor Launchpad** - Front End Developer | Manhattan Beach, CA

February 2014 - September 2015

- As a member of the Web Services team, built websites and templates for financial industry clients, while collaborating with Front End Design and Development teams.
- Performed front end code deployments and built new HTML templates leveraging Bootstrap and jQuery. Converted these into ASP.NET templates within Ektron.
- Promoted and maintained best UX practices and provided creative solutions to complex customer requests.

**Deutsch** - Web Content Manager | Los Angeles, CA

March 2011 - March 2012

- Worked as part of a large tech team at the leading ad agency of the time.
  - Maintained and website development for clients including Volkswagen and HTC.
  - Worked closely with engineering, design and a dedicated QA team to ensure timelines were upheld.
  - Responsible for frontend development on Anthem's refresh across 5 Anthem Connects entities.
  - Lead the email development and testing initiatives for Volkswagen using Campaign Monitor and Litmus.
- 

## SOFTWARE DEVELOPMENT PROJECTS

### [Lite-Brite](#) - React, TypeScript, Sass

- Converted an existing project done in React to learn TypeScript within a short sprint.
- Styled with custom Sass.

### [FreebieMe](#) - Node.js, JavaScript, Sequelize, Postgres, Express, Bootstrap

- Created an app for users to post items they are offering to give away with full create, read, update, delete (CRUD) operations hitting all RESTful API calls.
- Implemented ES6 tagged template literals.
- Styled with custom CSS and Bootstrap.

### [Movie Search Interface](#) - Javascript, React, API, HTML5, Bootstrap

- React tool to search for movie information.
- 

## EDUCATION

**General Assembly** | Software Engineering Immersive

Remote 2021

Full-stack software engineering immersive student in an intensive, twelve-week, 450+ hour program focused on product development fundamentals, object-oriented programming, MVC frameworks, data modeling, and team collaboration strategies. Developed a portfolio of individual and group projects.

**University of Arkansas** | Fayetteville, AR

Bachelor of Arts (BA), Psychology
