EXPERIENCE

Software Engineer | Bunch of Ideas Agency **10/2024 – present**

- Implemented a Frontend redesign in Next.js, improving page load performance and delivering a refreshed UI across desktop and mobile devices.
- Developed a filterable city data visualization using React + Mapbox to help neighborhood councils identify and prioritize key city issues like graffiti and infrastructure needs.
- Set up the Contentful CMS with a GraphQL API, enabling non-technical staff to update content easily.

Front End Developer | Kenvue (formerly Johnson & Johnson) **10/2023 – 9/2024**

- Engineered dynamic, personalized email campaigns in Salesforce Marketing Cloud with AMPscript and in Shopify with Liquid.js, driving a record-setting 40% increase in Black Friday revenue compared to the previous year.
- Wrote optimized SQL queries to deliver precise customer segmentation and improve targeting efficiency across marketing campaigns.
- Migrated templated pages to Shopify with zero downtime, maintaining an uninterrupted customer experience during the transition.

Front End Developer | Intuit **11/2021 – 10/2022**

- Converted Figma designs into responsive WordPress landing pages, improved conversion rates, and drove new customer acquisition for 4M+ QuickBooks customers.
- Customized WordPress CSS and components to close design gaps and prevent launch delays.
- Reduced email production time 20% by rebuilding ~100 legacy templates into a modular, reusable component library, improving design consistency across all campaigns.

Software Engineer, Front End UI | Dollar Shave Club - Marina Del Rey, CA **11/2018 – 07/2020**

- Maintained DollarShaveClub.com for 125k+ daily users through copy, image, and layout updates in React and TypeScript, preserving brand consistency and site quality.
- Built responsive landing pages for high-profile seasonal campaigns, using AWS-hosted assets to engage 3M+ subscribers and drive sales.
- Conducted accessibility audits and implemented fixes to achieve WCAG 2.0 Level AA compliance, improving usability and preventing lost sales.

Front End Developer | Dermstore (formerly Target Co.) - El Segundo, CA **04/2018 – 07/2018**

- Developed HTML email promotions for an e-commerce platform with ~3.2M monthly visits, supporting campaigns that increased customer engagement.
- Performed extensive testing with Litmus to achieve seamless cross-platform functionality and to improve user engagement.

Front End Developer | TVGLa - Los Angeles, CA **11/2017 – 01/2018**

- Built websites using Vue.js + Styled Components for two Fox Searchlight films supporting Academy Award campaigns, including a Best Picture winner.
- Enhanced the DreamWorks *Trolls* website using HTML/SCSS to showcase upcoming season content to engage fans.

Front End Developer | **Advisor Launchpad - Manhattan Beach, CA** **02/2014 – 09/2015**

- Developed responsive web pages for financial clients using HTML/SCSS, Bootstrap, and jQuery, integrating ASP.NET templates into Ektron CMS for seamless content management.
- Built custom jQuery components to extend Ektron CMS functionality, enabling content editors to meet publishing requirements without backend changes.

Web Content Manager | **Deutsch - Los Angeles, CA** **03/2011 – 03/2012**

- Developed and maintained websites for clients, including Volkswagen and HTC, updated content and features to drive engagement during product launches.
- Built updated HTML/PHP websites across multiple Anthem brands, contributing to a large refresh that delivered a cleaner, more intuitive interface.
